Reproducing or quoting any part of this publication is permitted, provided this publication is accredited as the source. Please refer to the Statistics Singapore Website Terms of Use (<http://www.singstat.gov.sg/terms-of-use>) for more details on the conditions of use of this publication.

Statistical activities conducted by the Singapore Department of Statistics are governed by the provisions of the Statistics Act (Cap. 317). The Act guarantees the confidentiality of information collected from individuals and companies. It spells out the legislative authority and responsibility of the Chief Statistician. The Act is available in the Department's Website (www.singstat.gov.sg).

PREFACE

Population size, structure and changes have important implications for production, investment and consumption activities as well as community development, social networks and kinship ties. A good understanding of demographic forces and emerging trends is useful for policy makers, planners, businesses and the academia.

The Singapore Department of Statistics compiles, monitors and analyses Singapore's population statistics and indicators in detail. A report on **Population Trends** that puts together different aspects of demographic statistics is released annually. **Population Trends, 2019** is the fifteenth edition of the annual series.

The report comprises five chapters, namely, 'Population', 'Households and Housing', 'Family Formation and Dissolution', 'Fertility' and 'Mortality'. Key definitions and concepts are explained in text boxes in each chapter. Time series of commonly used indicators are included in the Statistical Appendices. Users can also explore the data time series in our e-service SingStat Table Builder at <http://www.singstat.gov.sg/tablebuilder>.

I would like to thank various government agencies for providing the necessary data for the compilation of indicators released in this report. My sincere appreciation is also extended to all others who have contributed to the successful completion of this report.

Wong Wee Kim
Chief Statistician
Singapore

September 2019

Our Vision

National Statistical Service of Quality, Integrity and Expertise

Our Mission

We deliver Insightful Statistics and Trusted Statistical Services that Empower Decision Making

Our Guiding Principles

- Professionalism & Expertise** *We adhere to professional ethics and develop statistical competency to produce quality statistics that comply with international concepts and best practices.*
- Relevance & Reliability** *We produce statistics that users need and trust.*
- Accessibility** *We facilitate ease of access to our statistics through user-friendly platforms.*
- Confidentiality** *We protect the confidentiality of individual information collected by us.*
- Timeliness** *We disseminate statistics at the earliest possible date while maintaining data quality.*
- Innovation** *We constantly seek ways to improve our processes, leveraging on new technology, to deliver better products and services to users.*
- Collaboration** *We engage users on data needs, data providers and respondents on supply of data, and undertake the role of national statistical coordination.*
- Effectiveness** *We optimise resource utilisation, leveraging on administrative and alternative data sources to ease respondent burden.*

* Data refer to Post-Secondary (Non-Tertiary) and Diploma & Professional Qualification.

Notes:

- 1) Total population comprises Singapore residents (i.e. Singapore citizens and permanent residents) and non-residents.
- 2) Data for 1970 and 1980 are based on *de facto* concept (i.e. the person is present in the country when enumerated at the reference period). Data from 1990 onwards are based on *de jure* concept (i.e. the person's place of usual residence).
- 3) Data from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.
- 4) Prior to 2003, data are based on Singapore's land area as at end-December. From 2003 onwards, data are based on Singapore's land area as at end-June.
- 5) Data refer to resident population.
- 6) Data refer to resident population, except for 1970 which refer to total population.
- 7) Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.
- 8) Data refer to resident households (i.e. households headed by a Singapore citizen or permanent resident), except for 1970 which refer to private households.
- 9) Data include other types of dwelling (e.g. non-HDB shophouses).
- 10) Data for years prior 2018 include non-privatised Housing and Urban Development Corporation (HUDC) flats.

	67.8	74.7	77.6	80.0	84.0	85.4	85.4 ^P

Notes (cont'd):

11) Data for 2019 are not available.

12) Total marriages comprise civil marriages registered under the Women's Charter and Muslim marriages registered under the Administration of Muslim Law Act. Data exclude civil marriages which were contracted overseas or under religious and customary rites, and were subsequently registered in Singapore in the reference year.

13) Data are based on resident grooms/brides and resident population, except for 1970 and 1980 which are based on total grooms/brides and total population.

14) Data are based on divorces and annulments. From 2004 onwards, data are based on divorces and annulments where the male/female spouses are residents (i.e. Singapore citizens and permanent residents).

15) The Singapore resident population as at June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

Population Trends

Chapter 1 Population

Population Size and Growth

Singapore's resident population was 4.03 million as at end-June 2019, an increase of 0.8 per cent from the previous year (Table 1.1). The Singapore citizen population grew by 0.8 per cent over the previous year to 3.50 million while the permanent resident population remained relatively stable at 0.53 million.

The non-resident population was 1.68 million as at end-June 2019, an increase of 2.0 per cent from the previous year. Overall, Singapore's total population grew by 1.2 per cent to 5.70 million.

Table 1.1 Singapore Population Size and Growth by Residential Status

Year	Number ('000)					Average Annual Growth ¹ (%)				
	Total Population	Singapore Residents			Non-Residents	Total Population	Singapore Residents			Non-Residents
		Total	Citizens	PRs			Total	Citizens	PRs	
1990	3,047.1	2,735.9	2,623.7	112.1	311.3	2.3 ²	1.7 ²	1.7 ²	2.3 ²	9.0
2000	4,027.9	3,273.4	2,985.9	287.5	754.5	2.8	1.8	1.3	9.9	9.3
2010	5,076.7	3,771.7	3,230.7	541.0	1,305.0	1.8	1.0	0.9	1.5	4.1
2015	5,535.0	3,902.7	3,375.0	527.7	1,632.3	1.2	0.8	1.0	-	2.1
2016	5,607.3	3,933.6	3,408.9	524.6	1,673.7	1.3	0.8	1.0	-0.6	2.5
2017	5,612.3	3,965.8	3,439.2	526.6	1,646.5	0.1	0.8	0.9	0.4	-1.6

2019	5,703.6	4,026.2	3,500.9	525.3	1,677.4	1.2	0.8	0.8	0.6	2.0

Notes: (a) '-' denotes nil or negligible.

(b) Data from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.

¹ For 1990 and 2000, growth rate refers to the annualised change over the last ten years. From 2010 onwards, growth rate refers to the change over the previous year.

² Growth rate is computed using population estimates based on *de facto* concept (i.e. the person is present in the country when enumerated at the reference period).

Population

Total population comprises Singapore residents and non-residents. Resident population comprises Singapore citizens and permanent residents. Non-resident population comprises foreigners who are working, studying or living in Singapore but not granted permanent residence, excluding tourists and short-term visitors.

Singapore's population estimates are compiled using the register-based approach since the *Census of Population 2000*. The basic count and profile of the population are based on a person's place of usual residence i.e. *de jure* concept.

Age Structure

The median age of the resident population continued to rise, reaching 41.1 years as at end-June 2019 from 40.8 years in 2018 (Chart 1.1). The proportion of the resident population aged 65 years and over also rose to 14.4 per cent from 13.7 per cent over the same period.

Chart 1.1 Age Distribution of Resident Population

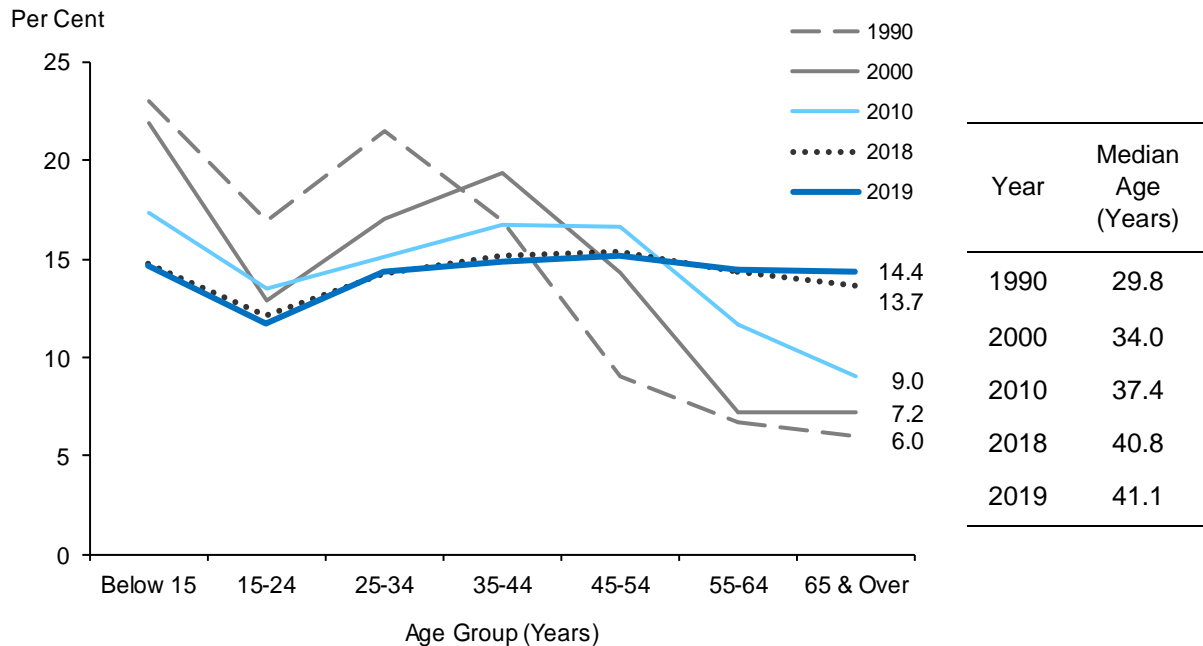

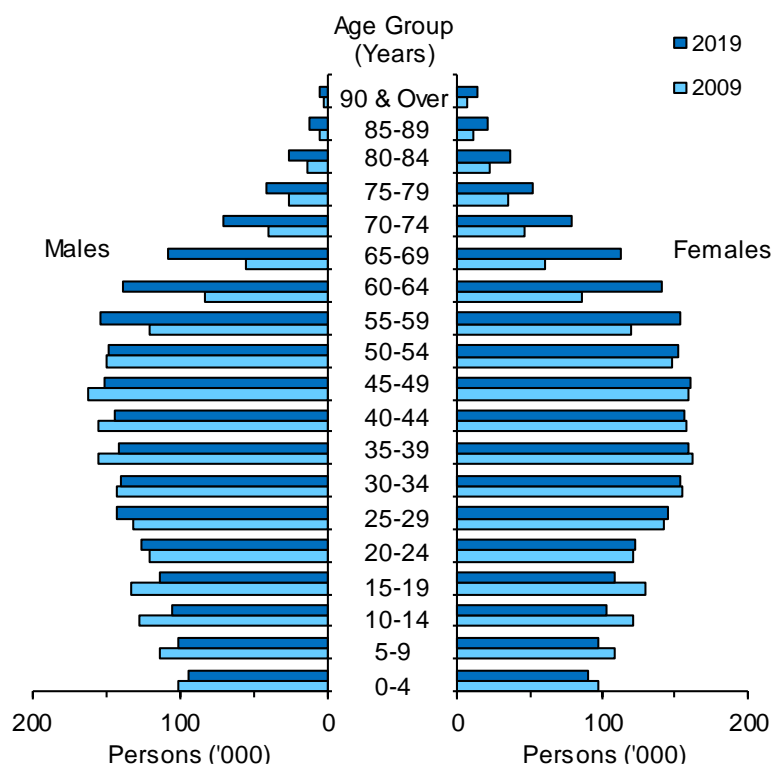

Chart 1.2 Age Pyramid of Resident Population

Old-Age Support Ratio

The old-age support ratio of residents continued to decline. As at end-June 2019, there were 4.5 residents aged 20-64 years for each resident aged 65 years and over, lower than the ratio of 4.8 in the previous year (Chart 1.3).

Chart 1.3 Resident Old-Age Support Ratio

Note: For 1971-1979, data refer to total population.

Ethnic Composition

As at end-June 2019, Chinese made up 74.4 per cent of the resident population (Chart 1.4). This was followed by Malays at 13.4 per cent, and Indians at 9.0 per cent.

Chart 1.4 Ethnic Composition of Resident Population

Sex Composition

Female residents continued to outnumber male residents. Among the resident population, there were 957 males per 1,000 females as at end-June 2019 (Chart 1.5).

Chart 1.5 Sex Composition of Resident Population

Marital Status

The distribution of the resident population aged 15 years and over by marital status remained stable over the past decade. In 2018, 59.9 per cent of residents were married and 31.2 per cent were single (or never married), similar to the proportions in 2008 (Chart 1.6). Widowed persons and those who were divorced or separated formed the smallest groups, at 5.0 per cent and 3.9 per cent respectively.

Given the longer life expectancy among females as compared to males, the proportion of females who were widowed were larger than that for males. Correspondingly, those who were married or single accounted for smaller shares in the female population than the male population.

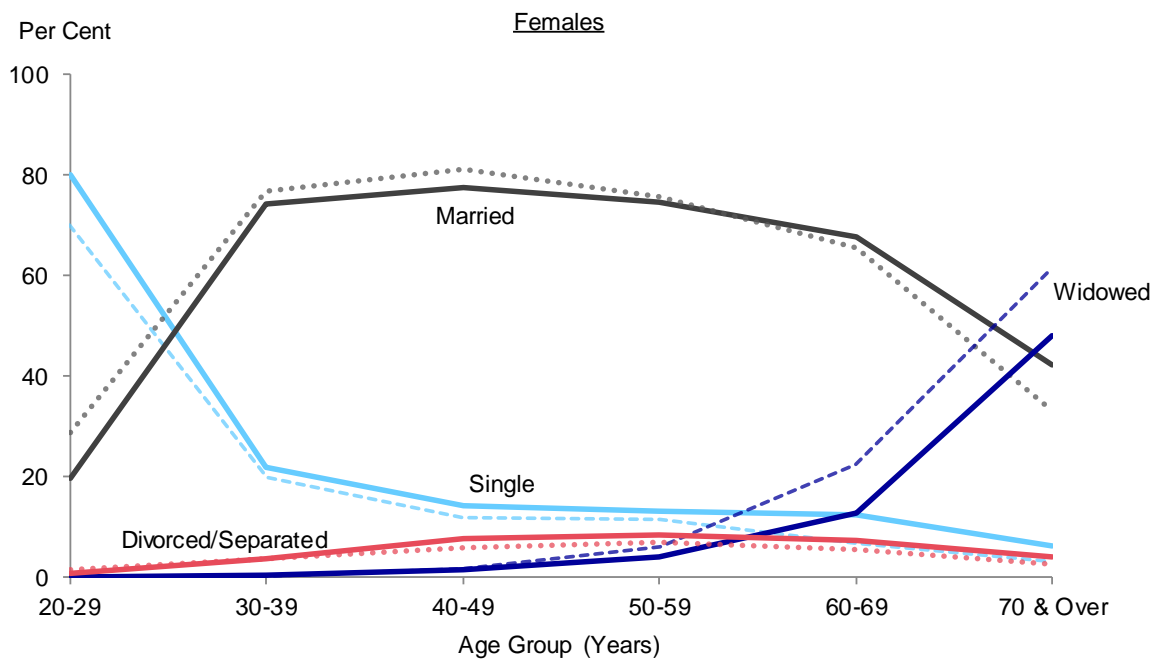

Chart 1.6 Marital Status of Resident Population Aged 15 Years and Over by Sex

Marital distribution among the resident population varied across age groups. For males, those in the younger ages of 20-29 years were predominantly single (Chart 1.7). For age 30 years and over, those who were married made up the majority.

For females, similar trends were observed except for those aged 70 years and over, among whom widowed persons formed the largest group.

Chart 1.7 Distribution of Marital Status Among Resident Population by Selected Age Group and Sex

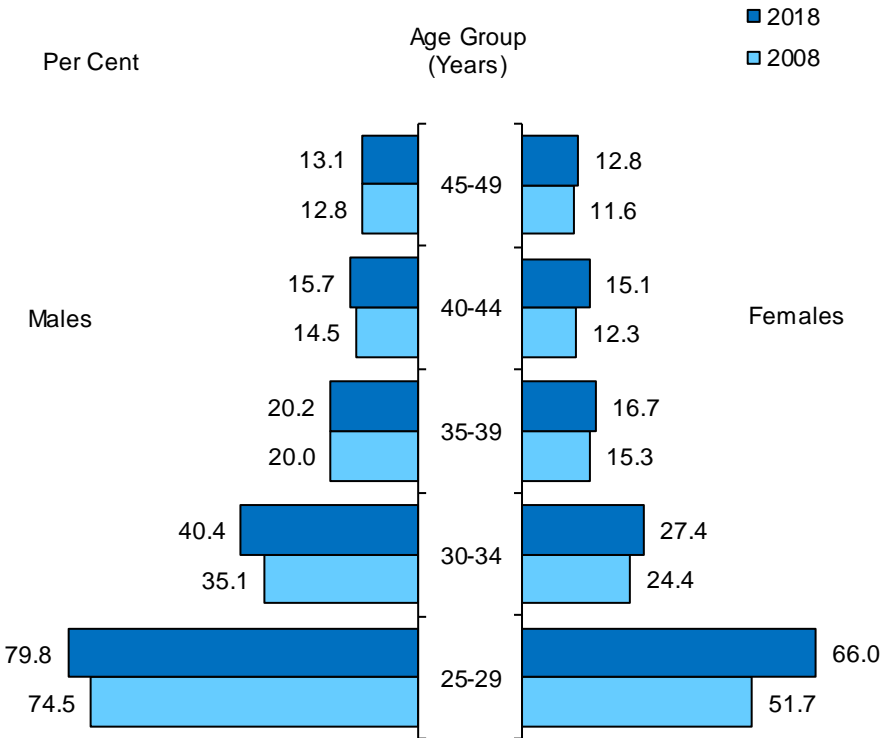

Proportion of Singles

Singlehood among the resident population aged below 50 years rose between 2008 and 2018, with the largest increase seen among the younger age groups of 25-29 years and 30-34 years. Among those aged 25-29 years, 79.8 per cent of males and 66.0 per cent of females in 2018 were single, up from 74.5 per cent and 51.7 per cent respectively in 2008 (Chart 1.8).

For those aged 30-34 years, 40.4 per cent of males and 27.4 per cent of females in 2018 were single, an increase from 35.1 per cent and 24.4 per cent respectively in 2008.

Chart 1.8 Proportion of Singles Among Resident Population by Selected Age Group and Sex

Males with lower educational qualifications and females with better educational qualifications were more likely to be single. In 2018, the proportion of singles among males aged 40-49 years with below secondary qualifications was 22.4 per cent, almost double the 12.0 per cent among those with university qualifications (Chart 1.9). In contrast, the proportion of singles among females aged 40-49 years with below secondary qualifications was 7.7 per cent, less than half of the 17.6 per cent among those with university qualifications.

Over the last decade, while the proportion of singles had increased among resident males aged 30-39 years and 40-49 years across all educational qualifications, the corresponding proportion fell slightly for females with secondary and below qualifications, as well as those with university qualifications.

Chart 1.9 Proportion of Singles Among Resident Population by Selected Age Group, Sex and Highest Qualification Attained

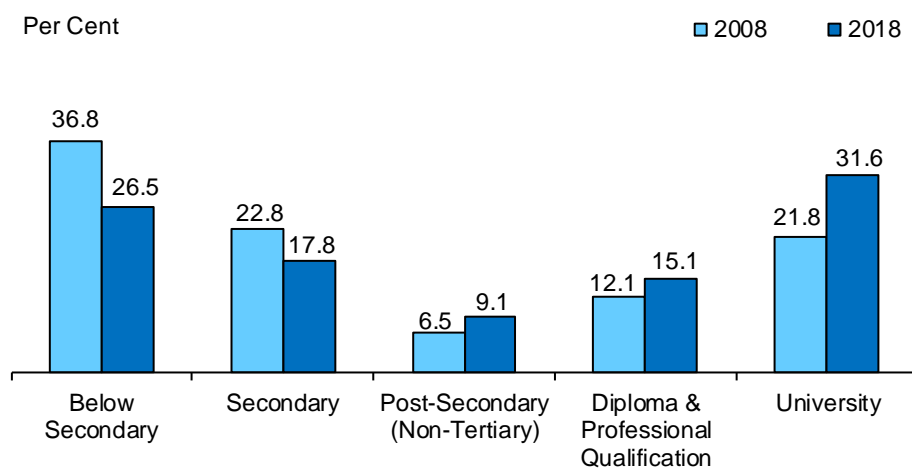

Note: Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

Education Profile¹

Among residents aged 25 years and over, the share of those with at least post-secondary qualifications rose from 40.4 per cent in 2008 to 55.8 per cent in 2018 (Chart 1.10).

This was mainly due to a higher proportion of university graduates which rose from 21.8 per cent to 31.6 per cent over the same period. The proportion with diploma & professional qualifications also increased from 12.1 per cent to 15.1 per cent.

Chart 1.10 Highest Qualification Attained of Resident Population Aged 25 Years and Over

¹ Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

The proportion of residents with university qualifications increased between 2008 and 2018 across all age groups (Chart 1.11).

Among residents aged 25-34 years, university graduates made up 55.4 per cent in 2018, rising from 44.1 per cent in 2008. For those with diploma & professional qualifications, the proportion decreased slightly from 24.2 per cent in 2008 to 23.0 per cent in 2018.

Proportions of both university graduates and diploma & professional qualifications holders rose for the 35-44 age group during the same period. The former increased from 31.0 per cent to 50.5 per cent while the latter increased from 15.0 per cent to 22.2 per cent.

Chart 1.11 Highest Qualification Attained of Resident Population Aged 25 Years and Over by Age Group

Reflecting the general improvement in educational attainment, the average number of years of schooling among residents rose from 9.7 years in 2008 to 11.1 years in 2018 (Chart 1.12).

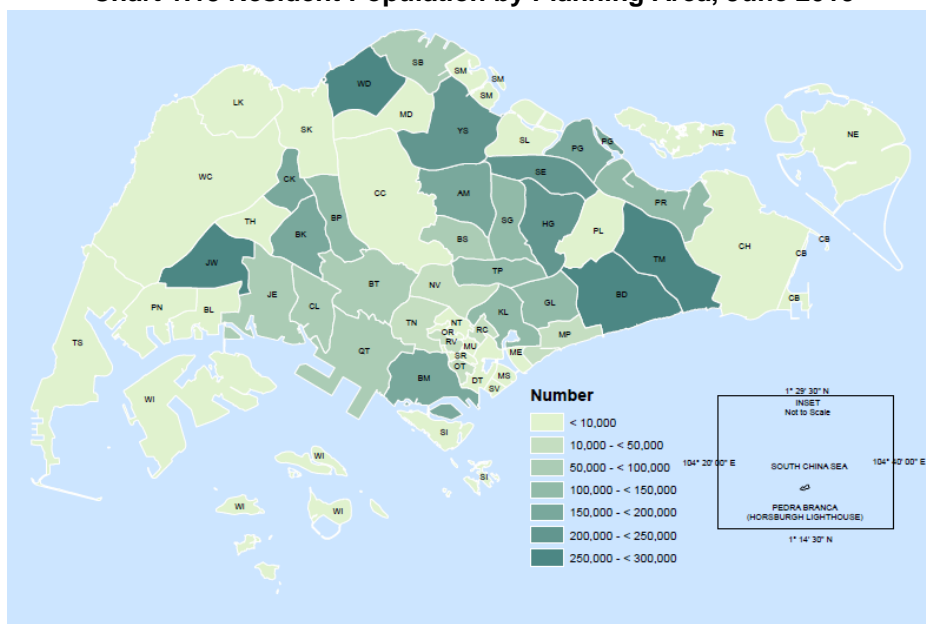

Chart 1.12 Mean Years of Schooling Among Resident Population Aged 25 Years and Over by Sex

Geographical Distribution

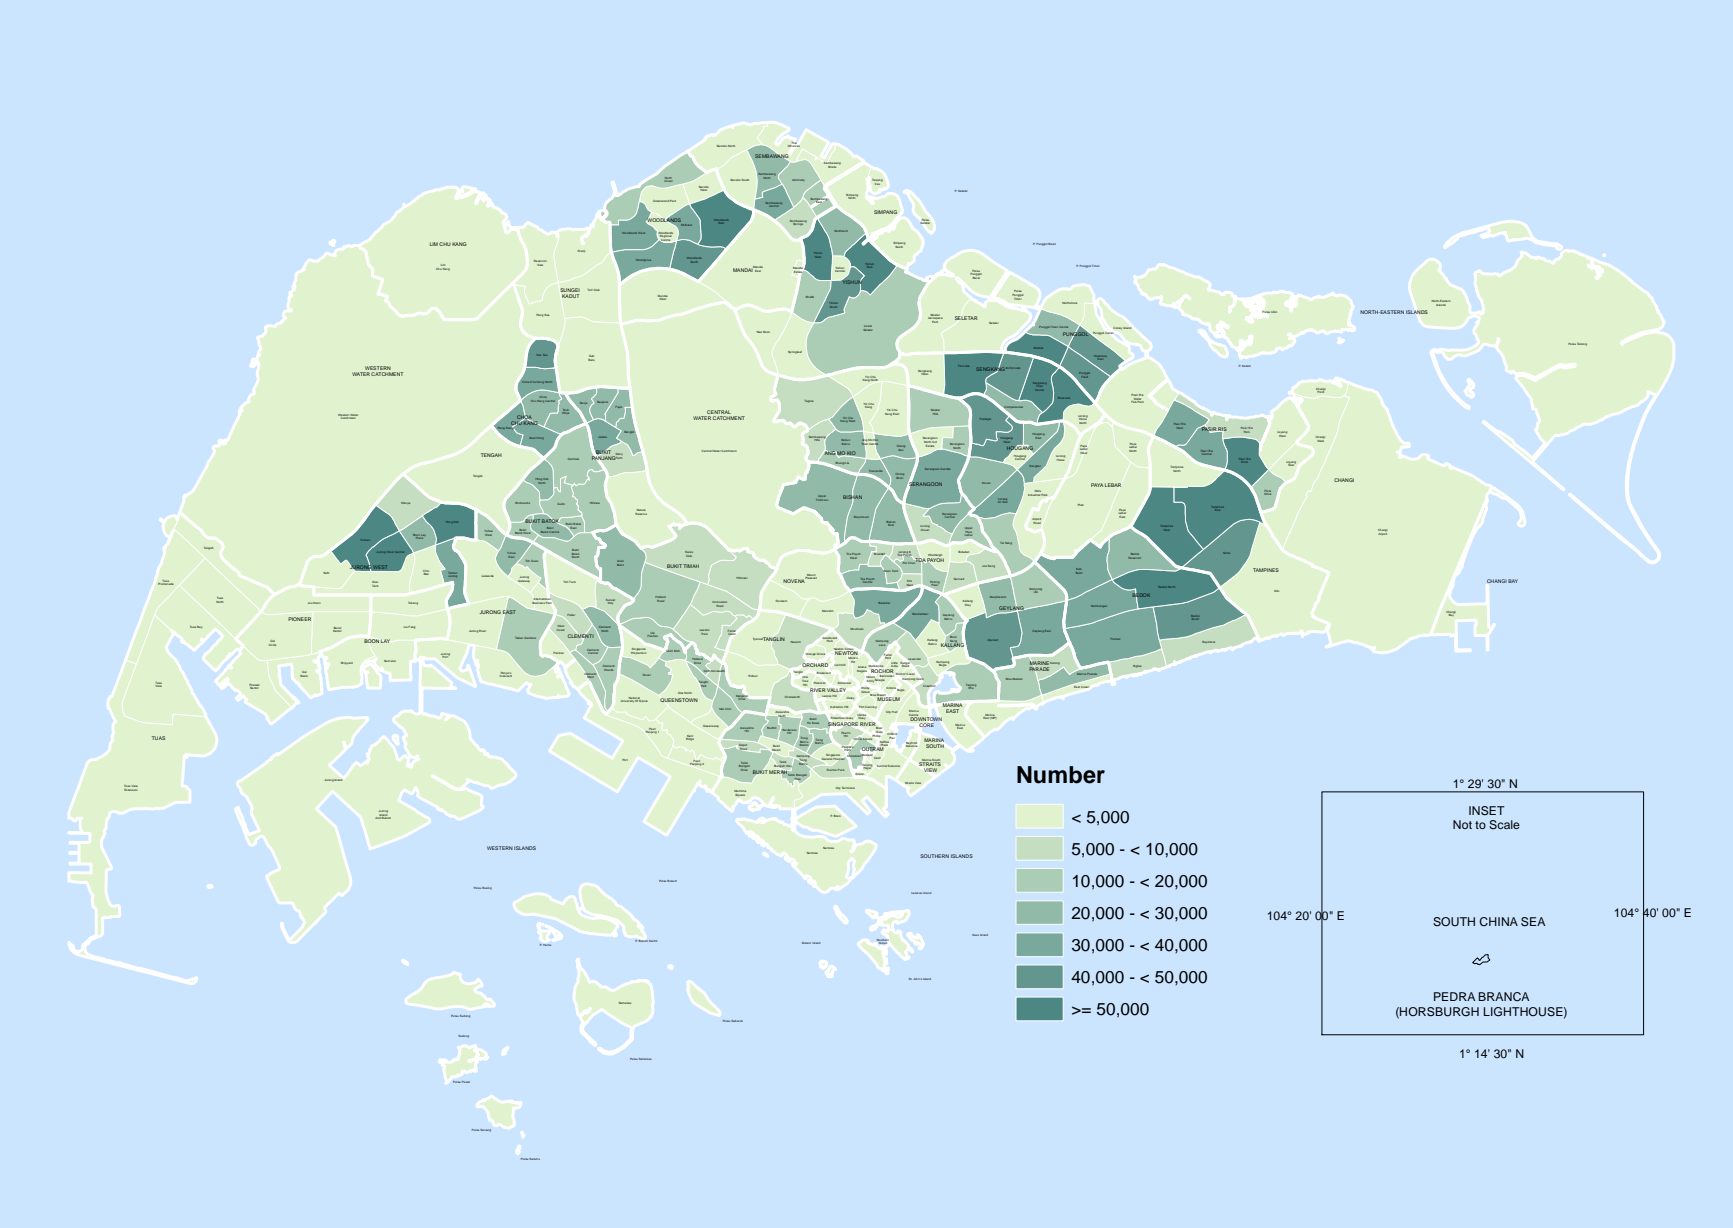

As at end-June 2019, 52.4 per cent of the 4.03 million residents in Singapore were concentrated in the top 9 planning areas² (Chart 1.13). There were four planning areas with more than 250,000 residents, namely Bedok, Jurong West, Tampines and Woodlands. Bedok had the highest number of residents of any planning area, with 279,380 residents.

Chart 1.13 Resident Population by Planning Area, June 2019

² Planning areas refer to areas demarcated in the Urban Redevelopment Authority's Master Plan 2014.

Chart 1.14 Resident Population by Subzone, June 2019

In 2019, Outram, Rochor, Bukit Merah, Ang Mo Kio, Queenstown, Sungei Kadut, Toa Payoh and Kallang had the highest proportions of residents aged 65 years and over (Chart 1.15). For each of these areas, approximately one in five residents were aged 65 years and over.

In comparison, relatively newer estates had a higher proportion of children aged below 5 years. In 2019, Punggol had the highest proportion of children aged below 5 years at 9.9 per cent (Chart 1.16). Nine other planning areas each had at least 5.0 per cent of residents aged below 5 years.

Chart 1.15 Proportion of Resident Population Aged 65 Years and Over by Planning Area, June 2019

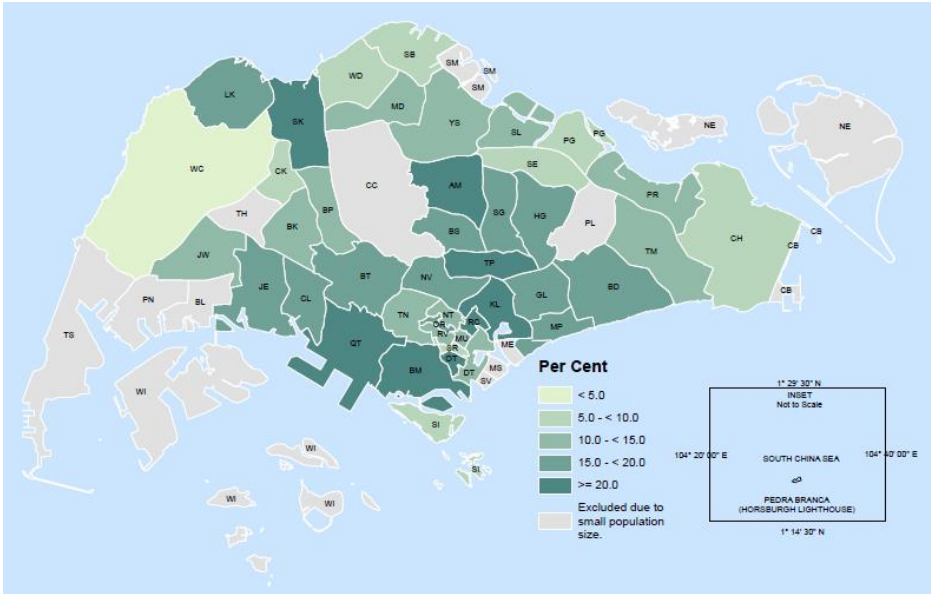

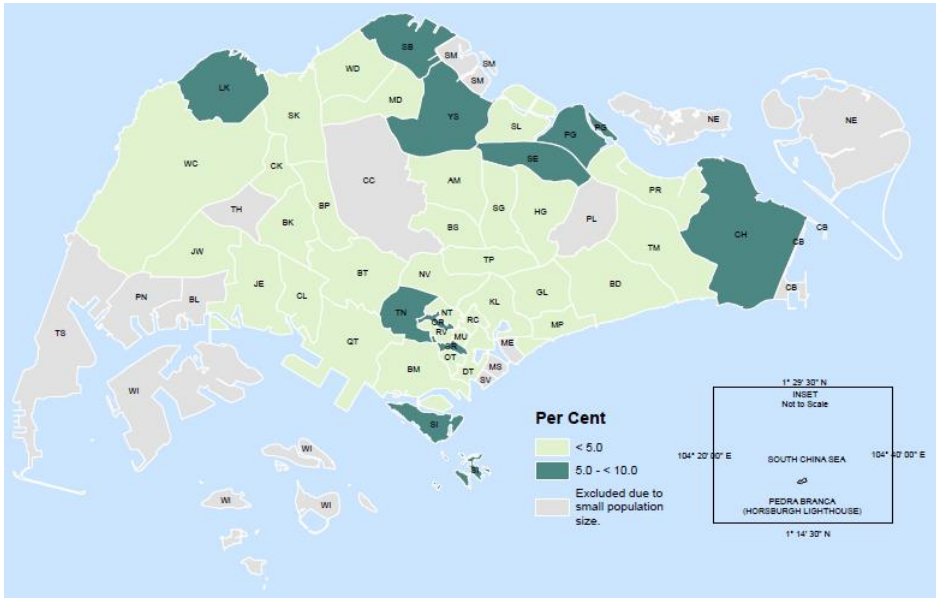

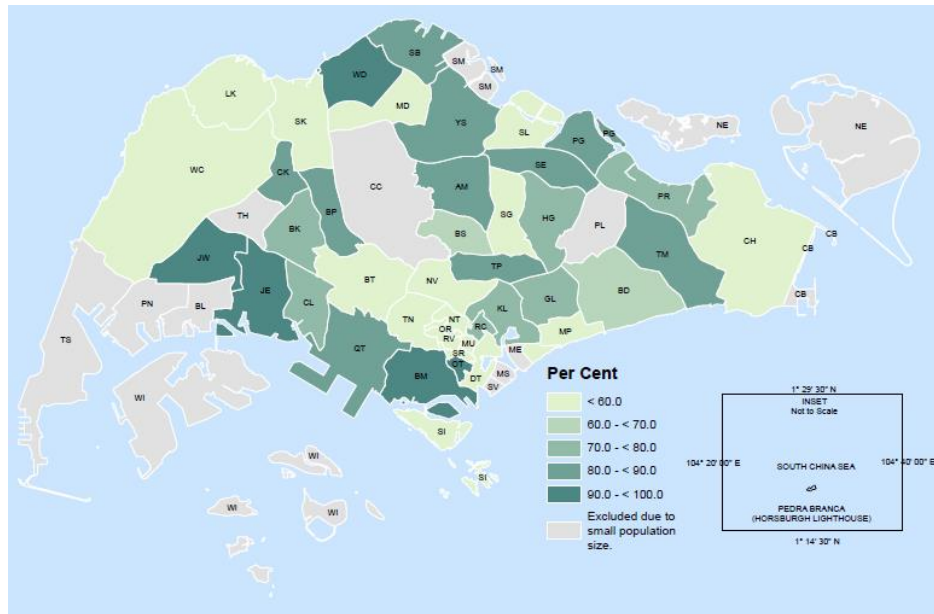

Chart 1.16 Proportion of Resident Population Aged Below 5 Years by Planning Area, June 2019

An estimated 3.15 million residents, or approximately four in five residents, resided in HDB flats in 2019 (Chart 1.17). There were five planning areas where 90 per cent or more were staying in HDB flats. Woodlands ranked first amongst planning areas with the highest proportion of HDB dwellers, followed by Jurong West.

Chart 1.17 Proportion of Resident Population Staying in HDB Flats by Planning Area, June 2019

Note:

Published maps are based on Urban Redevelopment Authority's Master Plan 2014 planning area boundaries and Singapore Land Authority's 2019 Singapore island profile. The Master Plan 2014 is a forward looking guiding plan for Singapore's development in the medium term over the next 10 to 15 years and the planning boundaries may not coincide with existing developments for some areas.

Chapter 2 Households and Housing

Resident Households

The number of resident households grew 2.7 per cent to 1.33 million in 2018 compared to the previous year (Chart 2.1).

Chart 2.1 Resident Households

Note: '-' denotes nil or negligible.

* For 1990 and 2000, growth rates refer to the annualised change over the last ten years. From 2010 onwards, growth rate refers to the change over the previous year.

Household

A household refers to (i) a group of two or more persons living together in the same house and sharing common food or other essential arrangements for living; or (ii) a person living alone or a person living with others but having his own food or other essential arrangements for living. Although persons may be living in the same house, they may not be members of the same household.

A resident household refers to a household headed by a Singapore citizen or permanent resident.

Type of Dwelling

In 2018, 78.7 per cent of resident households lived in Housing and Development Board (HDB) flats, with 31.7 per cent in HDB 4-room flats, making it the most common type of dwelling (Chart 2.2). The next two largest groups were those staying in HDB 5-room & executive flats and HDB 3-room flats, with 23.2 per cent and 17.6 per cent respectively in 2018. 6.1 per cent lived in HDB 1- & 2-room flats.

While the proportion of resident households in landed properties remained relatively stable at 5.1 per cent in 2018, the proportion of households living in condominiums & other apartments almost tripled over the past two decades from 5.4 per cent in 1998 to 15.9 per cent in 2018.

Chart 2.2 Proportion of Resident Households by Selected Type of Dwelling

* Includes HDB studio apartments.

Home Ownership

In 2018, 1.21 million resident households, or 91.0 per cent, owned their homes (Table 2.1). Since 2012, more than 9 in 10 resident households have owned their homes.

Table 2.1 Resident Households by Tenancy of Household

Year	Tenancy ('000)			Home Ownership Rate (%)
	Total*	Owner	Tenant	
1990	661.7	578.9	78.6	87.5
2000	915.1	841.6	63.4	92.0
2010	1,145.9	998.9	132.5	87.2
2011	1,146.2	1,015.9	103.5	88.6
2012	1,152.0	1,038.2	106.8	90.1
2013	1,174.5	1,062.5	105.7	90.5
2014	1,200.0	1,083.4	109.8	90.3
2015	1,225.3	1,112.4	106.2	90.8
2016	1,263.6	1,149.1	107.6	90.9
2017	1,289.9	1,170.2	109.8	90.7
2018	1,325.3	1,205.8	112.4	91.0

* Includes resident households in dwellings provided free by employers/others.

Tenancy of Household

Tenancy refers to the tenure status of the household with respect to the dwelling in which the household members live.

“Owner” refers to a household where the household head or any other member owns the house.

“Tenant” refers to a household which rents the dwelling or part of it.

Household Size

Household sizes among resident households are getting smaller. The average household size decreased from 3.30 persons in 2017 to 3.24 persons in 2018 (Chart 2.3).

In general, resident households with larger family sizes lived in landed properties or HDB dwellings with more rooms. In 2018, the average household size among those staying in landed properties was the largest at 4.17 persons, followed by 3.71 persons for those staying in HDB 5-room & executive flats. The average household size was the smallest at 2.08 persons for those living in HDB 1- & 2-room flats.

Chart 2.3 Average Household Size of Resident Households by Selected Type of Dwelling

^ Includes other types of dwelling (e.g. non-HDB shophouses). Data for years prior to 2018 includes non-privatised Housing and Urban Development Corporation (HUDC) flats.

* Includes HDB studio apartments.

Household Living Arrangement

Couple-based with children households continued to be the most common living arrangement among resident households, although the proportion of such households declined from 58.1 per cent in 2008 to 50.0 per cent in 2018 (Chart 2.4).

Conversely, the proportions rose for couple-based households without children (from 14.7 per cent to 17.3 per cent) and one-person households (from 10.0 per cent to 14.0 per cent) over the past decade.

Chart 2.4 Resident Households by Household Living Arrangement

Household Living Arrangement

Couple-based households refer to households with a married head and spouse. This category is further split into those living with children and without children.

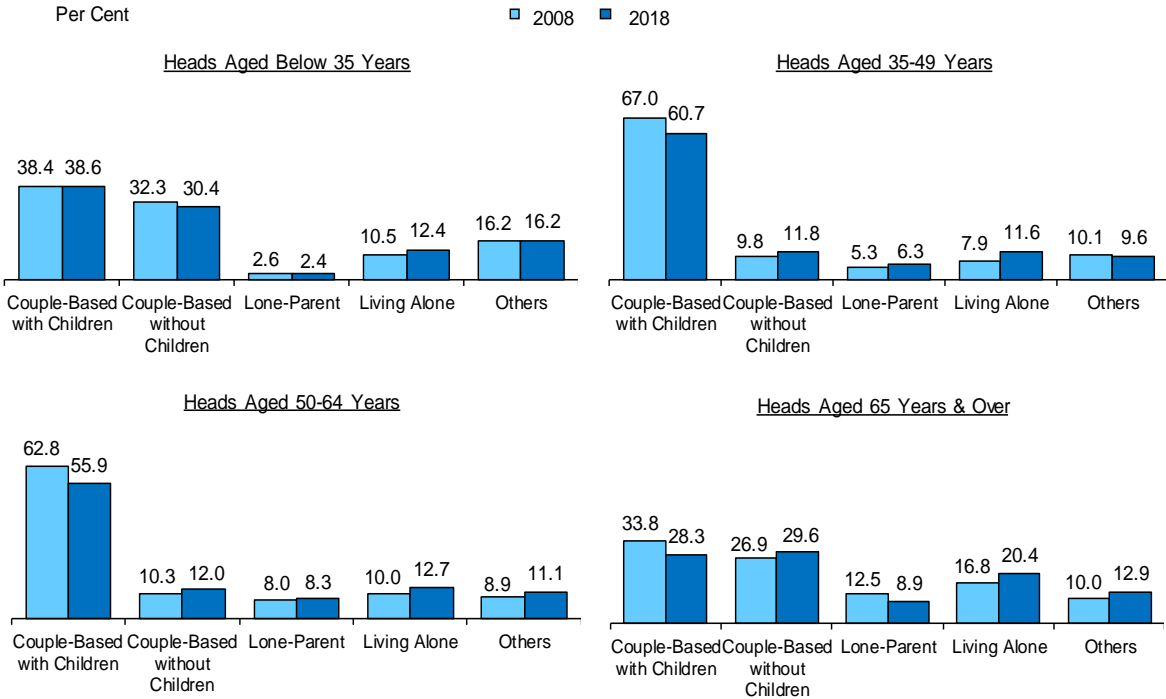

Lone-parent households refer to households whose head is never-married/widowed/divorced/separated and living with children aged below 16 years or never-married children.

Living alone households refer to one-person households. These include ever-married persons who are living alone as their children have grown up and moved out from the parental home.

Household living arrangements varied by age group of the household head, reflecting different stages of the lifecycle. In 2018, couple-based households with children were most prevalent among households with heads aged 35-49 years (60.7 per cent), followed by those aged 50-64 years (55.9 per cent) (Chart 2.5). This reflects the life cycle stages at which married couples set up families and raise children.

Among elderly heads aged 65 years and over, while couple-based households with children still formed a substantial proportion (28.3 per cent in 2018), the share of couple-based households without children, lone-parent households and one-person households were relatively higher compared to younger heads. This trend corresponds to the life cycle stage of grown up children leaving their parental homes or the passing away of one spouse.

Chart 2.5 Resident Households by Age Group of Head and Household Living Arrangement

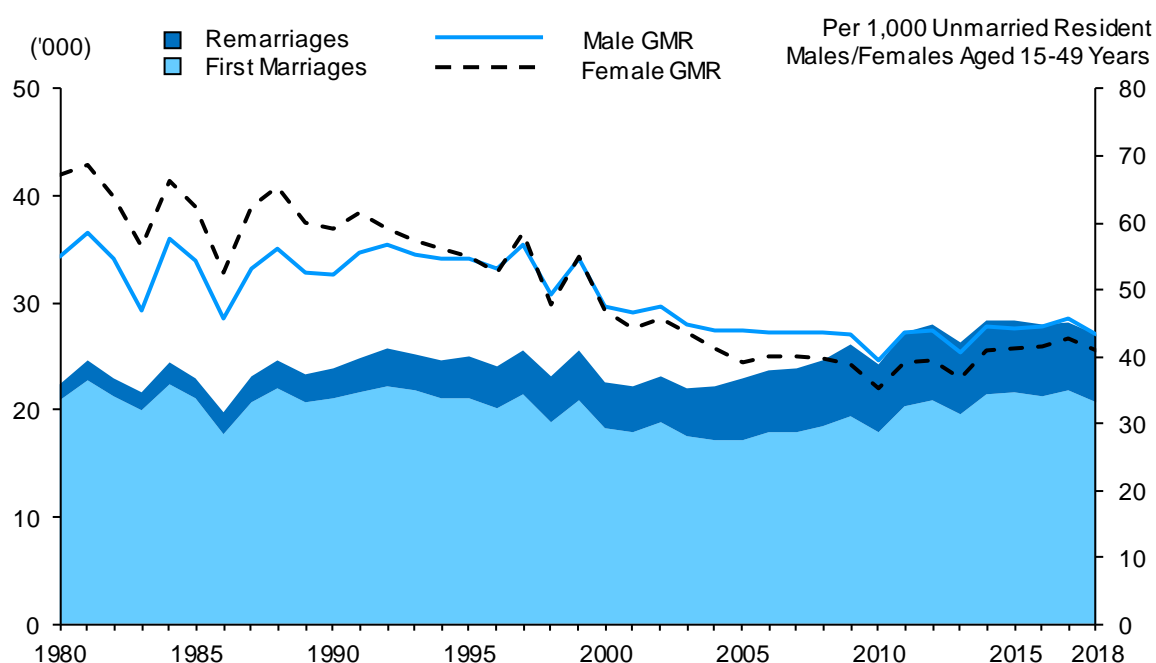

Chapter 3 Family Formation and Dissolution

Marriages

A total of 27,007 marriages were registered in 2018, down by 4.3 per cent from the 28,212 marriages registered in 2017 (Chart 3.1). The yearly average number of marriages over the last five years was 27,984, higher than the average of 26,378 between 2009 and 2013.

Among the marriages registered in 2018, more than three quarters or 20,822 were first marriages where neither party had previously been married.

Chart 3.1 Total Marriages and General Marriage Rate (GMR)

Note: Prior to 1984, data on GMR are based on total grooms/brides and total population comprising residents (i.e. Singapore citizens and permanent residents) and non-residents. Data from 1984 onwards are based on resident grooms/brides and resident population.

Total Marriages and Divorces

Statistics on marriages comprise civil marriages registered under the Women's Charter and Muslim marriages registered under the Administration of Muslim Law Act. They are obtained from records maintained by the Registry of Marriages and the Registry of Muslim Marriages.

Statistics on divorces and annulments are obtained from records maintained by the Family Justice Courts and Syariah Court. The records on revocation of divorces are obtained from the Registry of Muslim Marriages. Separations that do not confer on the parties the right to remarry are not covered.

More details on marriages and divorces are available in the publication "[Statistics on Marriages and Divorces, 2018](#)".

The general marriage rate fell in 2018. For males, the rate was 43.3 marriages per 1,000 unmarried males aged 15-49 years in 2018, down from 45.7 in 2017. Similarly for females, the rate was 40.8 marriages per thousand unmarried females aged 15-49 years, down from 42.8 the year before.

General Marriage Rate

The rate is defined as the number of marriages registered among persons aged 15-49 years during the year, out of every thousand unmarried population in the same age group.

Age-Specific Marriage Rate

Compared to 2017, marriage rates in 2018 fell across all age groups between 15-49 years, except for males aged 35-39 years and females aged 45-49 years (Chart 3.2).

Compared to a decade ago, marriage rates rose for males and females aged 30-39 years, as well as females aged 40-49 years. For males, marriage rates were the highest among the 30-34 years age group in 2018. For females, marriage rates were the highest among those aged 25-29 years and 30-34 years in 2018.

Chart 3.2 Age-Sex Specific Marriage Rate

Age-Specific Marriage Rate

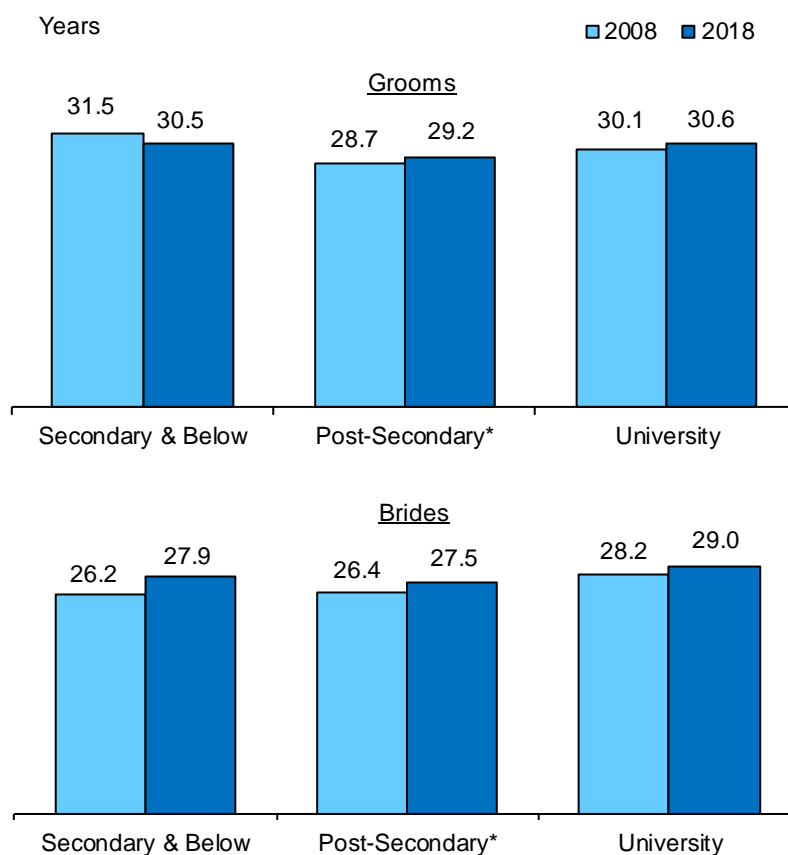

It is defined as the number of marriages registered within a specific age group during the year, out of every thousand unmarried population in the same age group.

Median Age at First Marriage

Compared to 2008, the median age at first marriage for brides in 2018 was higher across all educational groups (Chart 3.3). For grooms, the median age at first marriage for those with secondary & below qualifications fell from 31.5 years in 2008 to 30.5 years in 2018.

The median age at first marriage was the highest for both grooms and brides with university qualifications at 30.6 years and 29.0 years respectively in 2018.

Chart 3.3 Median Age at First Marriage of Grooms and Brides by Educational Qualification

* Post-Secondary comprises Post-Secondary (Non-Tertiary) and Diploma & Professional Qualification.

Marital Dissolutions

A total of 7,344 marriages ended in a divorce or an annulment in 2018, a decrease of 3.1 per cent from the 7,578 marital dissolutions in the previous year (Chart 3.4).

In tandem with the decline in the number of marital dissolutions, the general divorce rate fell for the second consecutive year in 2018 for both males and females. There were 6.7 male divorcees for every thousand married males aged 20 years and over in 2018, lower than the rate of 6.9 in 2017 and 7.1 in 2016. Similarly for females, the rate was 6.3 female divorcees for every thousand married females aged 20 years and over in 2018, down from 6.5 in 2017 and 6.6 in 2016.

Chart 3.4 Total Marital Dissolutions and General Divorce Rate (GDR)

Note: Data on GDR include annulments. From 2004 onwards, data on GDR are based on divorces and annulments where either or both spouses are residents (i.e. Singapore citizens or permanent residents).

General Divorce Rate

The rate is defined as the number of divorces and annulments granted to married persons aged 20 years and over during the year, out of every thousand married population in the same age group.

Annulment

This refers to the invalidation of a marriage. Parties whose marriages have been annulled are conferred the status of never having been married to each other.

Age-Specific Divorce Rate

Divorce rates have been higher among married persons in the younger age groups than the older age groups (Chart 3.5). Nevertheless, the differences narrowed over the last decade as divorce rates generally fell for those aged below 35 years and rose for those aged 40 years and over.

Chart 3.5 Age-Sex Specific Divorce Rate

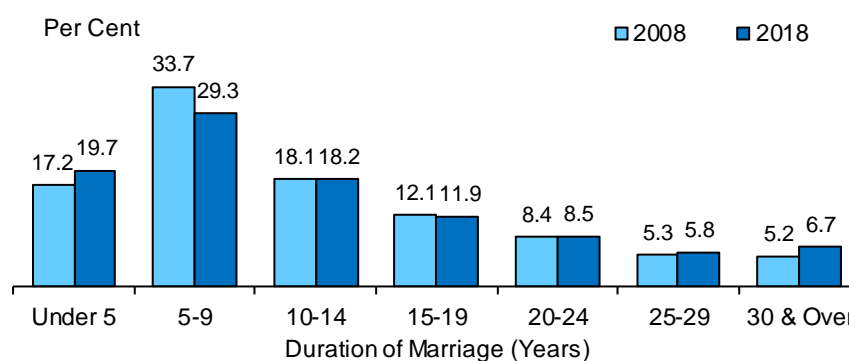

Age-Specific Divorce Rate

It is defined as the number of divorces and annulments granted to a specific age group during the year, out of every thousand married population in the same age group.

Marriage Duration of Divorcing Couples

The median marriage duration of divorces was 10.2 years in 2018, slightly longer than the 9.9 years in 2008. While couples with marriage duration of 5 to 9 years continued to form the largest share of divorces, its share fell from 33.7 per cent in 2008 to 29.3 per cent in 2018 (Chart 3.6). In contrast, the share of divorces with marriage duration of 20 years or longer increased over the same period.

Chart 3.6 Divorces by Duration of Marriage

Note: Data exclude annulments.

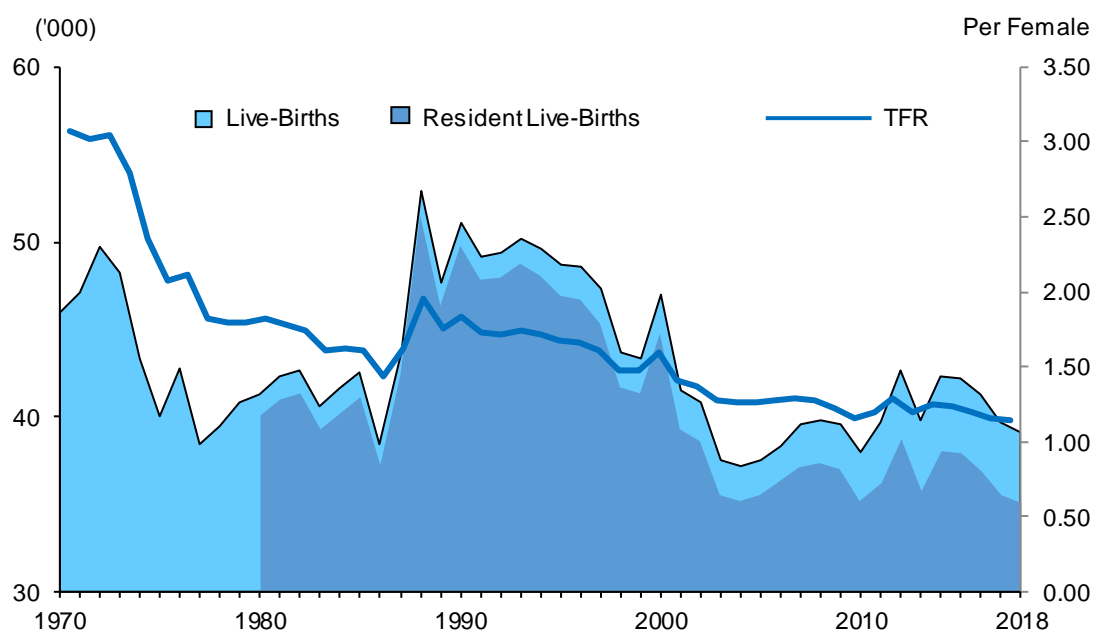

Chapter 4 Fertility

Births and Fertility Rate

Total live-births decreased by 1.5 per cent from 39,615 in 2017 to 39,039 in 2018 (Chart 4.1). Similarly, the number of resident births (i.e. births with at least one parent who is a Singapore citizen or permanent resident) also fell by 1.1 per cent from 35,444 in 2017 to 35,040 in 2018. The yearly average number of resident births over the last five years was 36,637, higher than the average of 36,511 between 2009 and 2013.

Singapore's resident total fertility rate (TFR) fell to 1.14 births per female in 2018, from 1.16 in 2017.

Chart 4.1 Total Live-Births and Total Fertility Rate (TFR)

Note: Prior to 1980, data on TFR pertain to total population. From 1980 onwards, data on TFR pertain to resident population (i.e. Singapore citizens and permanent residents). Data on resident births for 1980-1985 are estimated.

Live-Births

Statistics on live-births are obtained from records maintained by the Registry of Births and Deaths. The statistics refer to all live-births occurring within Singapore and its territorial waters as registered under the Registration of Births and Deaths Act (Chapter 267), and are compiled based on date of occurrence.

Total Fertility Rate

The rate refers to the average number of live-births each female would have during her reproductive years if she were subject to the prevailing age-specific fertility rates in the population in a given year. More details are available in the infographic [here](#).

Ethnic Differentials in Fertility

Compared to 2017, the resident TFR in 2018 declined for the Chinese, rose for the Malays and remained unchanged for the Indians (Chart 4.2). The TFR remained the highest for the Malays at 1.85 births per female in 2018, followed by 1.00 for the Indians and 0.98 for the Chinese.

Chart 4.2 Total Fertility Rate by Ethnic Group

* Includes the ethnic group "Others".

Age-Specific Fertility Rate

Resident fertility rates for females in 2018 were similar to 2017 across all age groups (Chart 4.3).

Compared to 2008, age-specific fertility rates fell for those aged below 35 years in 2018, and rose for those aged 35 years and over. Fertility rate has been the highest among females aged 30-34 years compared to the other age groups since 2002.

Chart 4.3 Age-Specific Fertility Rate

Births by Birth Order

While still making up the largest proportion of total live-births in 2018, the proportion of first order births fell consecutively for five years from the peak of 48.6 per cent in 2013 to 46.6 per cent in 2018 (Chart 4.4). Second order births made up 35.7 per cent, while third and higher order births constituted the remaining 17.7 per cent in 2018.

Chart 4.4 Proportion of Births by Birth Order

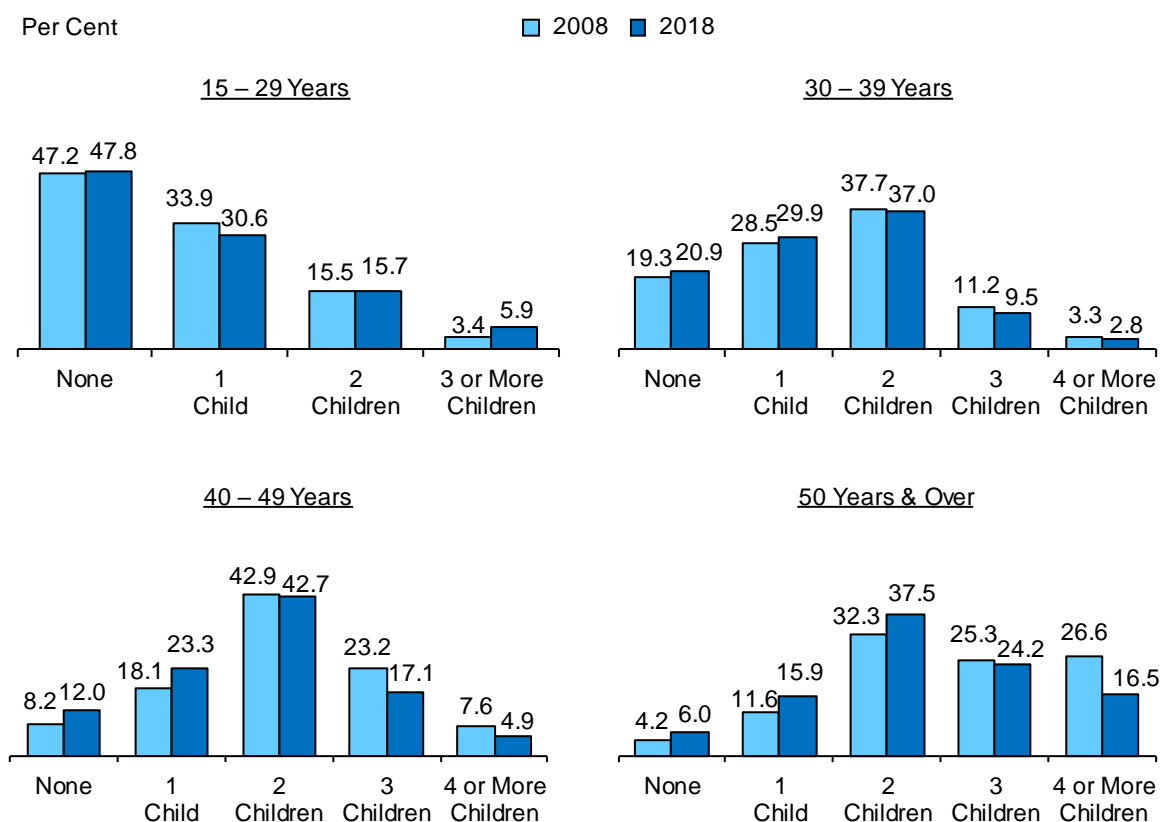

Number of Children Born

Those with two children continued to form the majority among resident ever-married females aged 30 years and over. In 2018, the proportion of those with two children accounted for 37.0 per cent among those aged 30-39 years, and 42.7 per cent among those aged 40-49 years (Chart 4.5).

The share of those with three or more children saw a decline over the last decade. Among resident ever-married females aged 40-49 years, the proportion of those with three or more children fell from 30.8 per cent in 2008 to 22.0 per cent in 2018. At the same time, those with only one child increased from 18.1 per cent in 2008 to 23.3 per cent in 2018. The proportion of those who were childless also rose from 8.2 per cent to 12.0 per cent over the same period.

Chart 4.5 Resident Ever-Married Females by Age Group and Number of Children Born

Average Number of Children Born by Age Group of Females

The average number of children born to resident ever-married females aged 40-49 years fell from 2.06 in 2008 to 1.81 in 2018 (Chart 4.6).

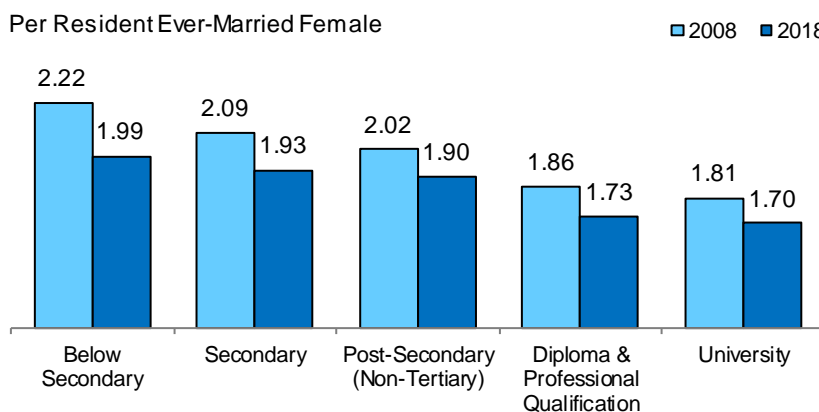

Chart 4.6 Average Number of Children Born by Age Group of Resident Ever-Married Females

Average Number of Children Born by Educational Attainment of Females

Among resident ever-married females aged 40-49 years, those with better educational qualifications generally had fewer children than those with lower qualifications (Chart 4.7).

Chart 4.7 Average Number of Children Born to Resident Ever-Married Females Aged 40-49 Years by Highest Qualification Attained

Note: Data pertain to residents who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

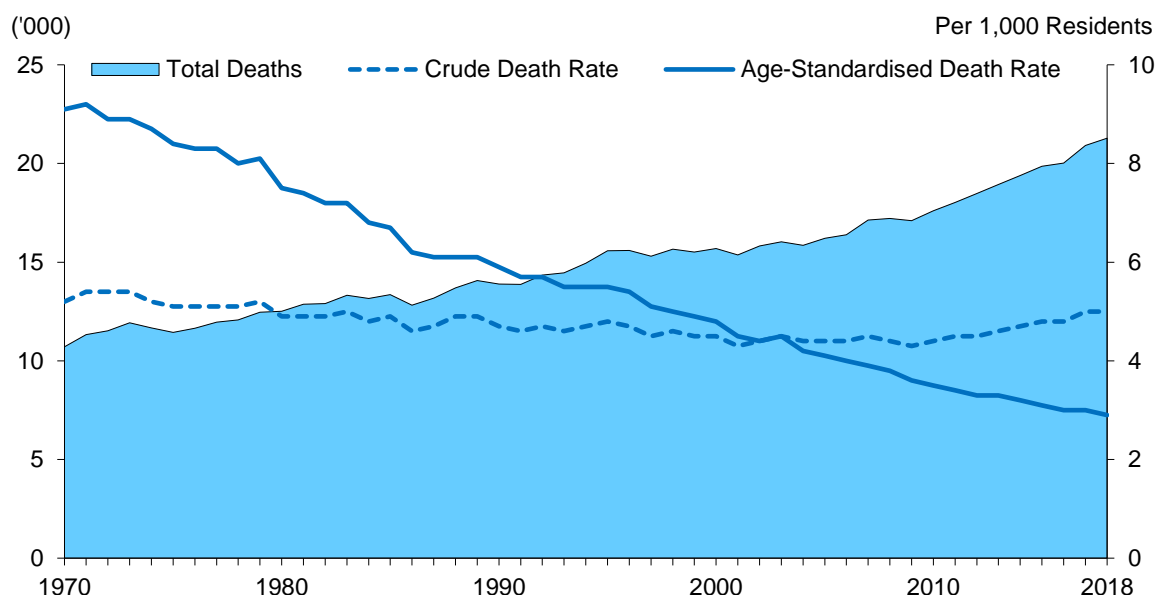

Chapter 5 Mortality

Deaths and Death Rates

The number of total deaths rose from 20,905 in 2017 to 21,282 in 2018 as the population continued to age (Chart 5.1). The resident crude death rate remained at 5.0 deaths per 1,000 residents.

The resident age-standardised death rate³, which takes into account the population age structure, declined from 3.0 deaths per 1,000 residents in 2017 to 2.9 deaths in 2018. The age-standardised death rate had been on a downward trend since 1970, reflecting the improvements in health and mortality.

Chart 5.1 Total Deaths, Crude Death Rate and Age-Standardised Death Rate

Note: From 1980 onwards, data on crude death rate and age-standardised death rate pertain to resident population (i.e. Singapore citizens and permanent residents).

Deaths and Death Rates

Statistics on deaths are obtained from records maintained by the Registry of Births and Deaths. The statistics refer to all deaths occurring within Singapore and its territorial waters as registered under the Registration of Births and Deaths Act (Chapter 267), and are compiled based on date of registration.

Crude death rate refers to the number of deaths per thousand population. Age-standardised death rate is another summary indicator of mortality that removes effects of age structure variations in the population over time.

More details on death rates are available in the article "[Age-Standardised Death Rate for Singapore](#)" in the Statistics Singapore Newsletter, September 2015.

³ The Singapore resident population as at June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

Age-Specific Death Rate

Age-specific death rates were lower for most age groups in 2018 for both resident males and females as compared to a decade ago (Chart 5.2). Resident females had lower death rates than resident males in general.

Chart 5.2 Age-Specific Death Rate

Infant Mortality Rate

The infant mortality rate remained stable over the last decade, ranging from 1.7 to 2.4 infant deaths per 1,000 resident live-births, and was 2.1 in 2018 (Chart 5.3).

Chart 5.3 Infant Mortality Rate

Infant Mortality Rate

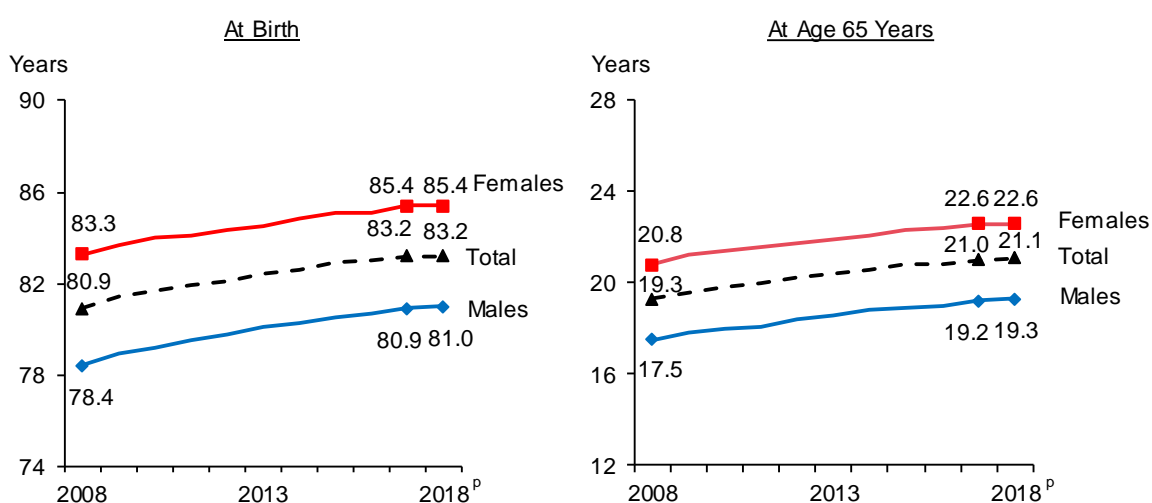

The rate refers to the number of deaths of children under one year of age per thousand live-births. Along with life expectancy, it is one of the most widely used indicators of the population's health status.

Life Expectancy

Singapore residents can expect to live longer compared to a decade ago. Life expectancy at birth of residents rose from 80.9 years in 2008 to 83.2 years in 2018 (Chart 5.4). Females continued to have longer life expectancy than males. Life expectancy at birth of resident females was 85.4 years in 2018, 4.4 years longer than that of resident males at 81.0 years.

Similarly, life expectancy at age 65 years also improved, from 19.3 years in 2008 to 21.1 years in 2018. The life expectancy at age 65 years was 19.3 years for resident males and 22.6 years for resident females in 2018.

Chart 5.4 Life Expectancy of Resident Population

Life Expectancy

It refers to the average number of additional years which a person at a specific age (such as at birth or age 65 years) could expect to live, if he or she were to experience the age-specific mortality rates of the reference period throughout his/her life. It does not take into account future changes in mortality. The life expectancy gives an indication of the average longevity of the population, but does not necessarily reflect the longevity of an individual.

This single indicator is commonly used to sum up the mortality experience of a population, taking into account the population's age and sex structure.

More details on life expectancy are available in the publication "[Complete Life Tables for Singapore Resident Population, 2017-2018](#)".

Note: Data on population from 2003 onwards exclude residents who have been away from Singapore for a continuous period of 12 months or longer as at the reference period.

¹ Census of Population. Data for 1980 and earlier Censuses are based on *de facto* concept (i.e. the person is present in the country when enumerated at the reference period). Data for 1990 onwards are based on *de jure* concept (i.e. the person's place of usual residence).

² For 1871-1980 and 1990, data refer to annualised growth rates over the previous Census year.

³ Prior to 2003, data are based on Singapore's land area as at end-December. From 2003 onwards, data are based on Singapore's land area as at end-June.

⁴ From 1970 onwards, data refer to resident population.

⁵ Growth rate is computed using population estimates based on *de facto* concept (i.e. the person is present in the country when enumerated at the reference period).

⁶ Based on 2003 unrevised population.

2018	97.3	98.9	95.9	11.1	11.6	10.6

¹ Among residents aged 15 years and over. Data for 1990, 2000, 2010 and 2015 are from the Population Censuses / General Household Survey. Data for 2013 were revised in March 2017 due to availability of more data sources. Literacy rate refers to the proportion of population who are able to read with understanding (e.g. a newspaper). It is derived based on information as reported in surveys, including the Population Censuses and General Household Surveys, as well as administrative data. Persons whose literacy is not known from surveys or administrative records are excluded from the computation of literacy rate.

² Among residents aged 25 years and over who are not attending educational institutions as full-time students. The data include those who are upgrading their qualifications through part-time courses while working.

² Refers to households with a married head and spouse not living with children. This includes households whereby children of the head have grown up and moved out from the parental home.

³ Refers to households whose head is never-married/widowed/divorced/separated and living with children aged below 16 years or never-married children.

⁴ Refers to one-person households. This includes ever-married persons who are living alone as their children have grown up and moved out from the parental home.

⁵ May include heads whose children are all overseas.

Table A2.6 Resident Households by Household Living Arrangement and Age Group of Youngest Child, 1990 – 2018 (cont'd)

Household Living Arrangement / Age Group of Youngest Child	Number ('000)								
	2010	2011	2012	2013	2014	2015	2016	2017	2018
Total	1,145.9	1,146.2	1,152.0	1,174.5	1,200.0	1,225.3	1,263.6	1,289.9	1,325.3
Couple-Based with Children ^{1,5}	642.1	648.0	658.1	666.5	659.8	665.7	663.0	664.2	663.1
With Youngest Child Aged Below 6 Years	156.5	146.9	148.3	153.8	148.6	154.0	157.8	161.6	157.5
With Youngest Child Aged 6 – 11 Years	126.4	124.1	122.7	120.1	110.3	117.4	111.8	121.5	119.5
With Youngest Child Aged 12 – 15 Years	86.2	89.7	88.0	86.6	77.7	84.1	76.7	72.7	71.5
With Youngest Child Aged 16 Years & Over	273.1	287.4	299.2	306.0	323.2	310.1	316.7	308.4	314.6
Couple-Based without Children ²	157.2	177.6	173.2	170.6	189.3	188.1	209.9	219.8	229.3
Lone-Parent ^{3,5}	83.2	80.7	82.7	88.2	87.4	94.0	92.8	90.5	96.1
With Youngest Child Aged Below 6 Years	3.1	2.8	2.8	2.8	2.4	3.3	2.8	3.2	3.7
With Youngest Child Aged 6 – 11 Years	8.8	9.3	8.1	8.6	8.6	9.6	8.7	8.7	9.5
With Youngest Child Aged 12 – 15 Years	9.0	9.2	10.2	8.3	10.0	10.5	10.1	7.8	9.3
With Youngest Child Aged 16 Years & Over	62.3	59.4	61.6	68.5	66.4	70.6	71.3	70.7	73.6
Living Alone ⁴	139.9	114.0	109.5	124.4	134.8	146.0	156.2	167.9	185.4
Others	123.6	126.0	128.6	124.8	128.7	131.6	141.7	147.6	151.5

¹ Refers to households with a married head and spouse living with children.

² Refers to households with a married head and spouse not living with children. This includes households whereby children of the head have grown up and moved out from the parental home.

³ Refers to households whose head is never-married/widowed/divorced/separated and living with children aged below 16 years or never-married children.

⁴ Refers to one-person households. This includes ever-married persons who are living alone as their children have grown up and moved out from the parental home.

⁵ May include heads whose children are all overseas.

Table A3.1 Total Marriages, 1980 – 2018

Year	Total Marriages (Number)			Proportion of First Marriages (Per Cent)		Median Age at First Marriage (Years)		Resident Crude Marriage Rate ² (Per 1,000 Residents)	Resident General Marriage Rate ³ (Per 1,000 Unmarried Residents Aged 15-49 Years)	
	Total ¹	First Marriages	Re-marriages	Males	Females	Males	Females		Males	Females

2018	27,007	20,822	6,185	83.6	85.3	30.2	28.5	6.4	43.3	40.8

Note: Data refer to civil marriages registered under the Women's Charter and Muslim marriages registered under the Administration of Muslim Law Act. Civil marriages which were contracted overseas or under religious and customary rites, and were subsequently registered in Singapore in the reference year are excluded.

¹ Total in 2008 includes marriages where the previous marital status of grooms was not reported.

² Data for 1980 are based on total marriages. Data from 1985 onwards are based on resident marriages (where either or both the groom and bride are residents).

³ Data for 1980 are based on total grooms/brides and total population. Data from 1985 onwards are based on resident grooms/brides and resident population (i.e. Singapore citizens and permanent residents).

¹ Data include annulments.

² From 2004 onwards, data are based on divorces and annulments where either or both spouses are residents (i.e. Singapore citizens and permanent residents).

³ From 2004 onwards, data are based on divorces and annulments where the male/female spouses are residents (i.e. Singapore citizens and permanent residents).

¹ Refers to births with at least one parent who is a Singapore citizen or permanent resident. Data for 1980 and 1985 are estimated.

² Refers to the average number of daughters each female would have during her reproductive years if she were subject to the prevailing age-specific fertility rates in the population in a given year.

³ Refers to the average number of daughters each female would have during her reproductive years if she were subject to the prevailing age-specific fertility and mortality rates in the population in a given year. It is a refinement of the gross reproduction rate, and is also the measure of replacement of population.

Table A4.2 Resident Age-Specific Fertility Rate, 1980 – 2018

Year	Per Thousand Females						
	15 – 19	20 – 24	25 – 29	30 – 34	35 – 39	40 – 44	45 – 49

¹ The Singapore resident population as at June 2003 is used as the standard population which is chosen to fix the age structure to eliminate its effect on mortality trends.

² Prior to 1990, data refer to total population.

³ Refers to the number of deaths of persons under 28 days of age per thousand live-births.

⁴ Refers to the number of still-births and deaths of persons under 7 days of age per thousand live-births and still-births.

⁵ Refers to the number of maternal deaths (i.e. deaths of mothers) per hundred thousand live-births.

⁶ Refers to the probability of a new-born baby in a specified reference period dying before reaching the age of 5, if subject to age-specific mortality rates of that reference period. This indicator is derived from a life table and expressed as the number of deaths per thousand live-births.

SINGAPORE DEPARTMENT OF STATISTICS INFORMATION DISSEMINATION SERVICES

Statistics Singapore Website

The *Statistics Singapore Website* was launched by the Singapore Department of Statistics (DOS) in January 1995. Internet users can access the website by connecting to:

www.singstat.gov.sg

Key Singapore statistics and resources are available via the following sections:

- **What's New**
Obtain latest data for key economic and social indicators, browse news releases by DOS and Research and Statistics Units (RSUs) of other public sector agencies.
- **Find Data**
Choose from almost 50 topics to access the relevant statistics, press releases, infographics, charts, storyboards, videos and references.
- **Publications**
Browse DOS's publications, papers and articles by topics. All publications are available for free access.
- **Advance Release Calendar**
View dates of upcoming releases in the half-yearly ahead calendar.

The website also provides a convenient gateway to international statistical websites and resources:

- **IMF Dissemination Standards Bulletin Board**
View metadata and latest data about Singapore's key indicators in the real, fiscal, financial and external sectors, including dissemination practices and information about pre-release access of current indicators.
- **International Statistics**
Access international databases, websites of international bodies and national statistical offices.
- **International Classifications**
Access quick links to international economic and social classifications.

SingStat Express

Subscribe to SingStat Express and receive email and SMS alerts (for local users) on the latest statistical releases of your choice. Details are available at www.singstat.gov.sg/whats-new/sign-up-for-alerts.

SingStat Mobile App

The SingStat Mobile App provides users with on-the-go access to latest key Singapore official statistics and ASEAN statistics via their mobile devices. The app allows visualisation of data with over 200 charts of commonly used statistics from 28 data categories. Users can also opt to receive notifications on updates to their preferred indicators, organise data categories in the order of their preference, download tables or share charts via social media, perform computation for quick analyses and bookmark indicators for quick access. The app is available for downloading in iOS and Android devices. More information is available at www.singstat.gov.sg/our-services-and-tools/singstat-mobile-app.

SINGAPORE DEPARTMENT OF STATISTICS
INFORMATION DISSEMINATION SERVICES (*cont'd*)

SingStat Table Builder

The SingStat Table Builder contains data series from 60 public sector agencies providing a comprehensive statistical view of Singapore economic and socio-demographic characteristics. Users may create customised data tables, and export them in different file formats and download multiple tables at one go. APIs for commonly accessed tables are provided in JSON and CSV formats for ease of data retrieval. In addition, developer APIs are available for users to customise and use the parameters available to define queries. Explore data trends with this digital service at www.singstat.gov.sg/tablebuilder.

Really Simple Syndication

Really Simple Syndication (RSS) is an easy way to stay updated on the latest statistical news released by DOS. The SingStat RSS feed delivers statistical news highlights and hyperlinks to the source documents whenever the updates are posted. More information is available at www.singstat.gov.sg/whats-new/really-simple-syndication-rss.

E-survey

The E-survey enables business organisations to complete and submit their survey forms through the internet. Using secured encryption protocols, the E-survey ensures that the information transmitted through the net is secured and protected. The system features online helps and validation checks to assist respondents in completing their survey forms. With the E-survey, respondents do away with the tedious paper work and manual tasks of mailing or faxing their survey returns to DOS.

Statistical Enquiries and Feedback
